

Protect Crete X100 Green Cure Project Detailer 2021

Project Background and Description

Concrete Consultant Specialists Limited required a highly effective cure, densify and dust reduction concrete treatment for approximately 2,400m² of exterior storage yard at the new National Mini Storage facility in Hobsonville, Auckland. Protect Crete X100 Green Cure was selected by Tapa to suit his client's requirements.

Project Scope

Concrete Consultant Specialists Director Tapa Henry selected Protect Crete X100 Green Cure as a cost effective and trusted solution for his client. Having had great results with other projects, Tapa applied X100 Green Cure to the freshly placed concrete as soon as the surface was trafficable, and prior to the cutting of the control joints.

Project Deliverables: X100 Green Cure

- Will cure concrete equal to water pond curing.
- Virtually eliminates plastic cracking.
- Low cost cure regime.
- Hardens surface and reduces dusts.
- Reduces shrinkage.
- Retards efflorescence.
- Zero VOC, environmentally friendly, user safe.
- Compatible with most flooring and coating systems.
- After trade friendly.
- Minimum site disruption, trafficable after 2 hours.
